

Training on Socioeconomic Monitoring (SocMon) Methodology for Evaluation of Socioeconomics and Marine Resources Utilization at Selected Coastal Communities in Myanmar

Mawlamyine University, Mon State and
Asin Village, Ye Township
9-19 January 2014

Session 13: Secondary Sources/Key Informant Indicators¹

Ms. Eva Marie Ponce de Leon
Palawan State University

¹Prepared by Dr Michael Pido, Prof Marissa Pontillas and Ms Eva Marie Ponce de Leon Palawan State University Puerto Princesa City, Philippines / Dr Robert S Pomeroy, University of Connecticut, USA,

Key Informant Indicators

Key Informant/ Secondary Sources Indicators	What it is	How to collect the data
KS1-StudyArea	<ul style="list-style-type: none"> •Location of the coastal and marine resources •Location of the stakeholders 	Secondary Sources (SS)
KS2-Population	Total number of people residing in the study area	SS
KS3-Number of Households	Total number of Households in the study area	SS

Key Informant Indicators

Key Informant/ Secondary Sources Indicators	What it is	How to collect the data
KS4- MigrationRate	% change in population size as a result of people moving into and out of the study area	SS
KS5-Age	% of different age categories in the of study area	SS
KS6-Gender	% of the population that are male and female	SS

Key Informant Indicators

Key Informant/ Secondary Sources Indicators	What it is	How to collect the data
KS7-Education	Average number of years of formal schooling completed by study area members	SS
KS8-Literacy	% of members that are able to read and write	SS
KS9-Ethnicity	% of members that belong to different ethnic groups	SS

Key Informant Indicators

KeyInformant/ Secondary Sources Indicators	What it is	How to collect the data
KS10- Religion	% of members that have the various religious affiliations	SS
KS11- Language	% of members that spoke the language	SS
KS12- Occupation	Activities that provide livelihood, income, food, or other means of sustenance	SS

Key Informant Indicators

Key Informant/Secondary Sources Indicators	What it is	How to collect The data
KS13-Community Infrastructure	General measure of the local Community development and wealth	SS, Observation
KS14-Activities	Identification of the use of coastal and Marine resources in the study area	SS, KI, Observation
KS15-Goods and Services	Specific products produced from the Identified coastal and marine activities	SS, KI, Observation

Key Informant Indicators

Key Informant/Secondary Sources Indicators	What it is	How to collect The data
KS16-Types of Use	Identifies the specific method or Development being employed for each Coastal and marine goods/services.	SS, KI, Observation
KS17-Value of Goods and Services	The monetary value of each product in the market.	SS, KI

Key Informant Indicators

Key Informant Interviews/Secondary Sources	What it is	How to collect The data
KS18-Goods and Services Market Orientation	Identification of the market in which each product is primarily sold	SS, KI
KS19-Use Patterns	Location of coastal and marine activities	SS, KI, Observation
KS20-Levels of Impact	Measures of the perceptions of the general public of the levels of impact of coastal and marine activities on coastal and marine resources.	SS, KI, Observation

Key Informant Indicators

Key Informant Interviews/ Secondary Sources	What it is	How to collect the data
KS21-Types of Impact	Measures the perceptions of the general public of the type of impact of the coastal and marine activities on coastal and marine resources.	SS, KI, Observation
KS22-Level of Use By Outsiders	Amount of outsiders using the coastal resources relative to the amount of local users from the study area.	SS, KI, Observation
KS23-Household Use	Measures how households in the study area utilize coastal and marine g/s for consumption, leisure, and sale	SS, KI, Observation

Key Informant Indicators

Key Informant Interviews/ Secondary Sources	What it is	How to collect the data
KS24- Stakeholders	Individuals, groups or organizations of people who are interested, involved or affected by coastal resource management.	SS
KS25- Management Body	An institution that governs how coastal resource management is undertaken and ensures that there is a transparent process for planning, establishing and enforcing rules and regulations	SS, KI

Key Informant Indicators

Key Informant Interviews/Secondary Sources	What it is	How to collect The data
KS26- Management Plan	Sets out the strategic directions for the coastal resources management program.	SS, KI
KS27-Enabling Legislations	Formal legislations in place from government to provide coastal resources management with a sound legal foundation.	SS, KI
KS28-Resource Allocations	Human and financial resources that carry out the activities of the management plan.	SS, KI

Key Informant Indicators

Key Informant Interviews / Secondary Sources	What it is	How to collect the data
KS29-Formal Tenure and Rules	Use rights with respect to coastal activities.	SS, KI
KS31-Stakeholder Participation	Measure of the amount of Involvement of stakeholders in Making coastal management decisions.	SS, KI
KS32-Community and Stakeholder Organizations	Means for representing resource Users and stakeholders in coastal Resource management and for Influencing the direction of decision-Making and management.	SS, KI

Climate Change Indicators for KII based on SocMon Addendum

Key Informant Interviews Indicator- CC	How information will be useful to coastal managers	How to collect the data
CC1-Demographically vulnerable groups	<p>To identify groups and areas that may need the most assistance in climate change adaptation;</p> <p>To understand why certain geographic groups incur more climate-change associated risk</p>	SS, KI,HHI
CC2- Dependence on resources and services vulnerable to climate change impacts	<p>To predict future livelihood, economic, and food security impacts of climate change; To point livelihoods that are highly sensitive to particular climate threats</p>	SS, KI,HHI

Climate Change Indicators for KII based on SocMon Addendum

Key Informant Interviews Indicator- CC	How information will be useful	How to collect the data
<p>CC7- Formal and informal networks supporting climate hazard reductions and adaptations</p>	<p>To identify potential networks to serve as conduit for climate-related information and assistance; to collaborate with existing networks that might support adaptation and planning</p>	<p>KI</p>
<p>CC8- Ability of community to reorganize</p>	<p>To utilize local support from community leaders in adaptation work; To understand level of stakeholder participation in management and decision making</p>	<p>SS, KI,HHI</p>

Climate Change Indicators for KII based on SocMon Addendum

Key Informant Interviews Indicator- CC	How information will be useful	How to collect the data
CC9 - Leadership and Governance	<p>To utilize local support from community leaders in adaptation work;</p> <p>To understand level of stakeholder participation in management and decision-making</p>	SS, KI, HHI
